#### ▪ **Pasantías en Alemania**

La Zentrale Auslands- und Fachvermittlung (ZAF) es una dependencia de la Bundesagentur für Arbeit (Agencia de Trabajo) y está ofreciendo posibilidad a estudiantes extranjeros que estén matriculados en una universidad o centro de educación superior la posibilidad de realizar pasantías de hasta 12 meses en Alemania.

De especial interés son las áreas de ingeniería (industrial, construcción de máquinas, técnica de procesos, construcción de vehículos, electrotécnica entre otros). Los interesados deben tener al menos 18 años y ser estudiantes tiempo completo (en 3º semestre mínimo). Conocimientos básicos de alemán para poder comunicarse con los compañeros de trabajo es indispensable y tener buen nivel de inglés es recomendable.

#### ▪ **SLE plus: Berlin Training for International Development**

This summer the SLE plus: Berlin Training for International Development Cooperation at Humboldt-Universitaet zu Berlin is offering again three short term courses:

- Decentralised Management of Regional Development (3.08.-14.08.2009)
- Project Cycle Management (17.8.-28.8.2009)
- Conflict Prevention and Conflict Management (31.8.-11.9.2009)

A framework programme provides participants with the opportunity to become familiar with scholarly discussions in the area of development cooperation, and to meet with representatives of German governmental and non-governmental organisations active in the field of development cooperation.

Costs for each 10-day-course are € 500.00. (Partial) Scholarships will be available for qualified foreign alumni of German institutions of higher education and for alumni of universities who received a German sur-place-scholarship.

The deadline for scholarship applications: May 3rd.2009.

The programme funded by DAAD with funds from the Ministry of Economic Cooperation, the German Office of Foreign Affairs and the Senat of Berlin.

For all further information please check "SLE plus: Berlin Training" on the following website: [www.berlinerseminar.de](http://www.berlinerseminar.de)

▪ **Scholarships: International Master Program Environmental and Resources Management**

The four-semester Master Programme "Environment and Resources Management" is composed of the curricula of the renowned MSc Programmes "Programa Multidisciplinario de Posgrado en Ciencias Ambientales" at the Universidad Autónoma de San Luis Potosí, Mexico and "Technology and Resources Management in the Tropics and Subtropics" at Cologne University of Applied Sciences. Its general objective is to qualify young professionals from Latin America and Germany for a career in the public and private environmental sector as well as for further PhD studies in the field of environmental sciences and natural resources management.

The first two semesters are conducted in San Luis Potosí, the third in Cologne while the fourth is reserved for the field research and elaboration of the master thesis, which may be related to a project in any country in Latin America or Germany. Teaching languages are Spanish in Mexico and English in Germany.

Students of the Master Programme are prepared to identify, analyze and solve environmental problems, with the aim to formulate solutions which consider technological, economic and social aspects. Furthermore they are qualified to conduct trans-disciplinary basic and applied research in the context of environmental sciences. Science skills and the elaboration of the master thesis topic are fostered from the first semester on, culminating in the research for the master thesis in the fourth semester which also qualifies graduates for future PhD studies.

The graduates acquire up to date knowledge regarding recent technologies, concepts, approaches and methods on sustainable and suitable energy systems, integrated land and water management, waste management as well as the decontamination of soils and other resources management topics. In addition, they are equipped with intercultural communication skills, cultural knowledge related to the involved countries and a profound knowledge on international development cooperation institutions and private sector projects.

The involvement of a wide range of external experts as invited speakers, field visits in Mexico and Germany to private and public institutions and companies as well as to development cooperation institutions and international organizations related to the environmental sector guarantee a permanent contact towards practice. Furthermore, options to realize internships and to conduct the master thesis in collaboration with ongoing projects are facilitated.

## **PRESENTACIÓN DE CARRERAS / OPORTUNIDADES DE ESTUDIO**

### ○ **European Master in Intercultural Education – Freie Universität Berlin**

The course is designed for those who work in the educational sector, be it in schools or other institutions, who are interested in dealing with subjects related to intercultural pedagogics. Lecturers with a broad scientific, practical and research background will be discussing and researching the following areas with you:

- Intercultural and anti-racism education
- Language training
- International social work with children and adolescents
- Migration, multicultural societies and globalisation
- Mechanisms of inclusion and exclusion

In addition you will receive an introduction to the application of new media. The programme combines theory, practical training and empirical research to cover the whole range of intercultural pedagogics. We offer courses with small numbers of participants

### ○ **International Media Studies – Universität Bonn**

It is a joint project from the University of Bonn, the Bonn Rhein-Sieg University of Applied Sciences and Deutsche Welle, Germany's international broadcaster with its headquarters in Bonn. The bilingual Master's Program offers a unique course offer given the current development of global media and the connection between media and cooperative development. Students from around the world will benefit from the inclusion of partners and the unparalleled mix of research, lectures and practical experience. The program combines topics like media and development, journalism, communication science and media economics, while developing practical skills and competencies that are important for the world of media.
